

Shipping

Loaded railcar is shipped from its place of origin to our facility. Car types include hoppers, tanks, boxcars, gondolas, and flat cars, determined by the commodity being hauled.

Receiving

Loaded railcar is received at our facility, placed by either CSX or Norfolk Southern

Unloading

Product is efficiently unloaded from railcar at our facility. Bulk commodities are unloaded in one of several ways: gravity pits, hard car unloader, conveyor, pneumatically, or liquid pump. Boxcars, gondolas and flat cars are unloaded using forklifts or other lifting implements

Warehouse or Other Storage

In some cases, products may need to be stored for future delivery

Transload to Destination

Product is transloaded onto trucks for delivery to its final destination
